MANITOBA CENSUS JUNE 1916

Grain Output of 1915

Index to Blue Print.

1. Shows the number of people the area available for settlement could accommodate at 10 persons per square mile, (rural population) and whatat the same density the present population requires. The Upper bar representing the number of square miles available for settlement and the lower bar representing the area thereof occupied on the basis of 10 persons per square mile. Page 4.

2. Constituency of Nelson, page 4. 3. Constituency of Dauphin, page 4. 4.Constituency of Marquette, page 4. 5. Constituency of Brandon page 4.
6. Constituency of Souris, page 4. 7. Constituency of Neepawa, page 4. 8.Constituency of Macdonald, page 4. 9. Constituency of Lisgar, page 4.
10. Constituency ofPortage la Prairie, page 4. 11. Constituency of Selkirk, page 4. 12. Constituency of Springfield. 13. Constituency of Provencher.P.4.

In Graphs 2 to 13 are shown correctly the boundaries of each constituency, and in each constituency is shown the acreage occupied by Grains and Stock and have each been plotted to the same scale as the constituency. The area occupied by Wheat represented by "W", Barley by "B", Oats by "O", and Other Grains is represented by "X". On the basis of 5 acres for each Horse, acres required represented by "H", on the basis of 4 acres for each head of Cattle, acres required represented by "C". 1 acre for each Sheep, acres required represented by "S". 1 acre for each Pig, acres required represented by "P". Page 4.

In the cases of Nos.2,3,11 and 12, the large block surrounding the areas allotted or occupied for the purposes specified represents the correct area in and of the land available for settlement in each said constituency. In Nos. 4, 5, 6, 7, 8, 9, 10 and 13, the whole constituency is available for settlement excepting so far as Forest Reservations are concerned, which reservations are shown in detail in Graph 16. Most of these Forest Reservations have been subdivided but withdrawn from settlement. Page 4.

The Census returns have the constituencies arranged alphabetically as follows:- 1. Brandon, 2. Dauphin, 3. Lisgar, 4.Macdonald, 5.Marquette, 6. Neepawa, 7. Nelson, 8.Portage la Prairie, 9.Provencher, 10 Selkirk, 11. Souris, 12. Springfield, the other three being constituencies of Winnipeg are not agricultural.

14. Shows the total population for each constituency, illustrated by a diagram, also the percentage of increase of 1916 over 1911. Page 5.
15. Shows the Rural population for each constituency, illustrated by a diagram, also the percentage that the rural population in each constituency is of the whole Province. Note the percentage of Cities, Towns and Villages that are included in the estimate of the Rural Population. Page 5.
16. The area in each constituency now available for settlement, also what percentage such area is of the whole Province which is now available for settlement. Page 5.
17. Shows the number of acres that are now available for settlement for each unit of Rural Population. Page 5.
18. Shows the number of acres in crop for each unit of Rural Population in each constituency. Page 6.
19. Total annual output of Grain and Stock for each constituency in value. (See note at end showing how estimate of annual output is arrived at.) Also the per capita of output based on the whole of rural population; based also on the acreage available for settlement and on the mileage of Railway. Page 6.
20. The mileage of railway in each constituency and the percentage each represents of the whole Provincial mileage. Also the percentage the area available for settlement is of the whole Province. Page 6.
20a. The square miles of area available for settlement in each constituency. The Rural Population per mile of railway and the Rural Population per square mile of area. Page 6.
21. The number of Horses in each constituency. 21a. The value of same, placing each at $100.00. Page 7.
21b. The percentage of the total value in the Province of this class in each constituency, also the percentage of the total annual output of all classes, Stock and Grain represented by each constituency. Page 7.
22. The number of Cattle in each constituency. 22a. The value of same placing each at $42.00. 22b. Data similar to 21b. Page 7.
23. The number of Sheep in each constituency. 23a. The value of same placing each at $8.00 23b. Data similar to 21b. Page 8.
24. The number of Pigs in each constituency. 24a The value of same placing each at $11.00 23b. Data similar to 21b. Page 8.
25. The number of bushels of Wheat in each constituency. 25a. Value of same placing $0.905 as the value per bushel. Page 9.
25b. The percentage of the total value in the Province of this class in each constituency, also the percentage of the total annual output of all classes, Stock and Grain, represented by each constituency. Page 9.
26. No. of bushels of Oats in each constituency. 26a. Value of same, placing $0.353 as the value per bushel. 26b. Data similar to 25b. Page 9.
27. No. of bushels Barley in each constituency. 27a. Value of same, placing $0.506 as the value per bushel. 27b. Data similar to 25b. Page 10.
28. Cities, Constituency within which each lies is the same name as the city itself, excepting St.Boniface (see note below No.30. Population 1916, also 1911, and percentage of increase between dates. Page 11.
29. Towns, Number, population and constituency, within which each town lies. Page 11.
30. Incorporated Villages, number, population and constituency within which each village lies. Page 11.
31. Graph of Railways, showing mileage of each line of railway in each constituency, the percentage that such mileage is of the whole mileage in each constituency, and also the mileage and percentage of each road within the whole Province. Page 12.
32. Note regarding Indian Population, page 12. 33. Note regarding Flax Production, page 12. 34.Note regarding Rye production, page 12.
35. Note regarding all grains excepting wheat, oats, barley, flax and rye, page 13.
36. Note regarding Forage Crops. page 13.

The annual output is arrived at as follows:- 25% of the value of Horses and Cattle, 50% of Sheep, and 80% of Pigs, 100% of the Grains, as per Nos. 21a to 27a, also Nos. 33 and 34.
